Gold Plus is first company in Pakistan to introduce ASI technology in Pakistan to make particle board.

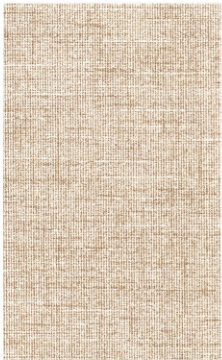

ASI technology uses precision air grading system to classify particles in granular form and uses classic former to make particle board as a result the surface is smooth and board is made strong with excellent air compaction.

ASI chipboard is excellent substitute for MDF because it offers superior qualities than MDF now widely used in Europe for all wood panel requirements in furniture, wardrobes, cabinets and kitchens.

Air Separation Intelligence

- Air Tight **HD** Edges
- Longer Life than MDF
- UV Level Perfect Surface
- New Screw Power Edge
